

Canson Infinity® Platine Fibre Rag 310 gsm - Satin

Canson® Infinity Platine Fibre Rag is the combination of the premium 100% cotton Platinum paper that Canson has supplied for many years to the original Platinum and Platine photographic market, with the latest microporous coating, making the traditional darkroom paper now available for your digital printing.

Setting the benchmark for Digital Darkroom papers, Platine Fibre Rag provides the aesthetic and feel of the original F-Type Baryta Fibre paper, having a true pure white tone without using optical brighteners that are known to affect the longevity of digitally produced images.

Platine Fibre Rag's extremely high Dmax and exceptional grey tones make it the product of choice for the more discerning black and white as well as colour photographic prints.

Testimonials

For the Platine Fibre Rag product

NORTH 1 2015 © Les Walkling

Les Walkling

Canson® Infinity Platine Fibre Rag is my favourite paper bar none. In fact, I can't imagine there is a more beautiful nor sustaining paper anywhere in the entire universe. No words can completely describe the extraordinary success I have when printing my images on Platine. Its luxurious base is so strong yet relaxed and yielding, supports a most exquisite surface that my images simply leap off. The most common compliment my Platine prints receive is 'where is the light coming from' for it appears to radiate from the inner heart of the paper itself. You could be excused for turning the print over and 'looking for the batteries', so strong and pervasive is this brilliant effect. Platine's depth, presence, luminosity and dimensionality, and overall pictorial richness transform my pictures before my eyes into remarkable works that capture hearts and minds. Seeing is believing, and with Platine I have truly 'seen the light'. Without Platine I would still

make satisfying and affecting pictures, but with Platine my work becomes a 'marriage made in heaven'.
